About me

I am a **full-stack developer** and **software architect**, strongly focused on **high-efficient** web applications. I am successfully combining my **knowledge from different specialities**. Also, I love **good codebase**, so I am always trying to highly improve developer experience by **automating work** - it's much faster and makes people **happy**, as they may focus on more exciting stuff.

12+ years of experience | **30+** big projects | **thousands** PRs and tickets

Technologies & skills

I've been working with many technologies, methodologies and techniques, both on front-end and back-end side. I've got big experience with server-rendered front-end applications as well. I was responsible for building and advising on **all stages and layers** of IT systems, including both **front-end and back-end architecture**. I've got also 8+ years of experience on (mostly technical) **leading** positions.

I am a **fast-learner**. I am trying to understand how technologies work on **low-level**, so learning a new one is much simpler. There is a lot of similarities, which make everything simpler to learn, when you are able to **find patterns**.

Languages	TypeScript (7+ yrs), JavaScript (12+ yrs), Golang (2+ yrs), Python (2+ yrs), PHP (5+ yrs)
Databases	PostgreSQL (6+ yrs), MongoDB (4+ yrs), ElasticSearch (2+ yrs), Python (2+ yrs)
Frontend	React (8+ yrs), Vue (2 yrs), Redux, Zustand, Angular (2 yrs)
Backend	Message Queues (RabbitMQ, AMQP 1.0, Kafka), Redis, Distributed Systems, Microservices, Containers, Kubernetes
Various	Performance (analysis & optimization), Developer Experience (automation), Software Architecture (frontend & backend), CI/CD, Terraform, Helm Chart

Selected experience

Full-stack Developer @ Testkube

1 year 11 months • March 2023 – now

At Testkube, a Kubernetes-native platform for automated test orchestration, I work on both front-end and back-end development, with a focus on architectural design. I've designed the Test Workflows mechanism — an innovative, flexible system for customizing and orchestrating test runs in complex Kubernetes environments. My contributions also include redesigning the architecture to enhance scalability and security, as well as creating a modular front-end architecture in React to unify the open-source and enterprise editions codebase.

Frontend Developer and Technical Lead @ Evident ID

2 years 8 months • September 2019 – April 2022

Leading multiple front-end applications. Focused on delivering the high-quality experience - from designing software, architecture, processes, and solutions, through providing the best environment for work (tests, CI/CD, automation), up to the direct implementation of new features, maintaining old ones, and migrating the legacy code into desired state.

Senior Frontend Developer and Technical Lead @ Talixo

1 year • March 2018 – February 2019

I was responsible for migrating the front-end into a new architecture, as well as improving and creating some services on the back-end side. Part of the work (UI Kit and styling tooling) has been open-sourced too.

Senior Software Developer and Technical Lead @ G2A

10 months • January 2017 – October 2017

Designing and implementing new systems behind (mostly NodeJS and PHP based on AWS and Azure clouds), as well as isomorphic SPAs (mostly using React stack on front-end) with high traffic and scalability in mind.

Senior Frontend Developer and Technical Lead @ Grand Parade

1 year 4 months • June 2015 – September 2016

I was mostly responsible for leading frontend teams, improving UX, preparing architecture for frontend (including backend facades and some other backend stuff) and just writing good and high efficient code. Most projects were based either on React/Redux or plain ES6 code. I was also responsible for frontend and PHP recruitment.

Web Application Developer @ Codete

9 months • September 2013 – May 2014

I was working both on frontend (mostly jQuery & AngularJS) and backend (Java - Play, PHP - Yii Zend, Symfony, NodeJS - Express) there. Beyond developer responsibilities, I was leading internal project for project management (Scrum / Kanban / SCM).
